

A DIVISION OF **NWESI**

Testing, Adjusting & Balancing
NEBB Certified Firm

INTEGRITY • TEAMWORK • PROFESSIONALISM • QUALITY

OUR APPROACH IS PROFESSIONAL, THOROUGH, AND OBJECTIVE.
WE ARE LEADERS IN THE INDUSTRY, ADDING VALUE TO ENSURE LONG-TERM BUILDING PERFORMANCE.
WE STRIVE TO UNDERSTAND OUR CLIENT'S GOALS, AND PROVIDE GUIDANCE AND TECHNICAL EXPERTISE.

OVERVIEW

Our team at Air Introduction and Regulation (AIR) provides clients with the assurance that their HVAC systems will perform to their highest efficiency. We maintain a wide range of instruments to test, adjust, and balance even the most complex systems, with a focus on occupant comfort and energy savings. Upon completion of the project, we provide a comprehensive report reflecting the actual operating performance. We pride ourselves in having numerous long-term relationships with clients, and working closely with contractors and facilities teams to ensure the job gets done right the first time.

In business since 1972, AIR has completed more than 6,000 Testing, Adjusting, and Balancing (TAB) projects in the Pacific Northwest. Since joining NWESI in 2010, their client base and capabilities have continued to expand throughout Oregon.

AIR is a NEBB Certified firm, whose Air Balancing Technicians receive on-going training and certification from both NEBB and the Associated Air Balance Council (AABC). As a whole, AIR has over 100 years of air and water balancing experience in the field.
