

ANNOUNCING AIR INTRODUCTION AND REGULATION'S 50TH ANNIVERSARY

We are proud to announce AIR Introduction and Regulation's 50th Anniversary! At the beginning of the partnership between AIR and NWESI, we couldn't have anticipated the growth, value, and purpose we would share between our businesses. Now, at AIR's 50th anniversary year, we're proud to have such a robust partnership between us.

AIR introduction and Regulation was spearheaded by founder Jeff Huntley, who has been in the business since 1972. His involvement in the explorative field of Testing, Adjusting, and Balancing at the time gave him an early look at the value and style of work TAB required.

After Jeff decided to semi-retire in 2010, he talked with NWESI, and the two businesses decided it would benefit both firms for NWESI to acquire AIR. This move enabled AIR to continue to serve their existing clients and pursue larger projects with more resources at their disposal. Throughout this time, Jeff has continued to support AIR with expertise in estimating and project approaches.

NWESI President Tom Prevish states "It's hard to imagine a time when the Air team was not part of

“ It's hard to imagine a time when the Air team was not part of NWESI. We've certainly been fortunate to have them as colleagues, and especially to have Jeff Huntley continue in such an active role so many years after the acquisition. ”

NWESI. We've certainly been fortunate to have them as colleagues, and especially to have Jeff Huntley continue in such an active role so many years after the acquisition."

AIR is currently managed by Chris Johnson, CP-TAB. Their location in Coburg, OR, has allowed the team to continue growing relationships with their existing clients,

and serve even more in Southern Oregon.

At this 50th Anniversary milestone, AIR's legacy continues to be the work they provide, and the people who gain skills and career paths from their time there. Over the course of their business, AIR is happy to have helped individuals learn about TAB, and assisted them with certifications, professional education, and providing clients with consistent, quality work. Their team has steadily grown from just a few key team members, to a 10 person office, and is actively searching for more individuals to join them. AIR is a strong support of the JATC TAB apprenticeships, and the value that skilled careers can bring to individuals at any stage of their professional career.

CONGRATULATIONS, AIR TEAM!
